FEATURES

Hot Food Friendly

Cold Food Friendly

No Added PFAS

Leak Resistant

Microwave Safe

Custom Print
MOQ: Starts at 50,000 PCS.

Renewable Materials
Made from plant fibers.

Certified Compostable
BPI-certified commercially compostable. Varies by item.

Recyclable
If clean and dry, check with your local municipalities/stores. Varies by item.

ABOUT US

Our full line of ECOWARE products is designed to support the food service industry with solutions that make a meaningful and positive global impact. Our strong commitment to sustainability has positioned us as a leader in innovative, environmentally responsible single-use packaging for food service, grocery, and catering markets.

FINELINE®

Set to Innovate™

planet + CONSERVEWARE

A Portfolio of Sustainable Brands

Natural Plant Fiber Tableware

- Our premium heavy-weight tableware is the most functional line of plant fiber products in the market today
- We use molded pulp which is widely considered the industry standard

Clear Deli & Take-Out Containers

- Variety of shapes and sizes available
- Environmentally friendly plant-based biopolymer
- High-performance “plastic” look and feel without petrochemicals

Hot Cups & Food Containers

- Quality and performance you can rely on
- Made of premium paperboard
- Custom printing available with plant-based inks - low minimum custom-print orders

Cutlery

- Heavy-weight cutlery in both a pearl white and matte black Available in bulk and wrapped options
- Made with all natural plant-based biopolymer
- Heat tolerant to 185° Fahrenheit

Clear Cold Cups

- One size lid fits 9-24 oz. cups
- Wide variety of lids available
- Custom printing available with plant-based inks - low minimum custom-print orders

Compostable Bags & Liners

- Designed for strength: T-shirt bags hold up to 25 lbs. and industrial liners hold up to 80 lbs.
- Prevents Odors: Cuts down on smells and keeps bins clean

How to Increase Your Brand Awareness

Elevate your brand with our Custom Printing Program. We've streamlined the process into three simple steps to help you transition from a design concept to a finished, branded product.

1. Submit Your Artwork

To ensure the highest print quality, please adhere to the following specifications:

- **ACCEPTED FILE TYPES:** Vector files only (AI, PDF, EPS). We are unable to process bitmap or raster images (JPEG, PNG). Do not distort your artwork for the tapering of any product.
- **COLOR CAPACITY:** Up to 6 colors (Availability varies by product; please verify with your representative).
- **COLOR MATCHING:** All colors must be specified using Pantone Solid Colors.
 - Kraft Products: Use Pantone Uncoated (U).
 - SBS, Bagasse & Plastics: Use Pantone Coated (C).

2. Approve Your Digital Proof

Precision is our priority. Once we receive your files, we will generate a digital proof for your review.

- **REVIEW & EDIT:** Carefully check for layout, spelling, and color accuracy.
- **AUTHORIZATION:** Production will not begin until we receive your final approval.

3. Fulfillment & Requirements

Before we go to print, please take note of our standard production terms:

- **PRINTING PLATE CHARGES:** Fees vary based on the product and design complexity; these will be detailed in your final estimate.
- **MINIMUM ORDER QUANTITY (MOQ):** MOQs vary - inquire for details.
- **LEAD TIME:** Our standard turnaround is 90 business days following the receipt of an approved Purchase Order (P.O.).

ITEM TYPE	MOQ	LEAD TIME	COLORS
Deli Containers	100 Cases	90-120 days	1-3
PLA Lined Hot Cups	100K/PCS	90-120 days	1-6

Why Use Spot Colors/Pantone Colors

Process Colors

CMYK

Spot Colors

Pantone (PMS) spot colors ensure precise accuracy and should be chosen based on your material's surface.

- PMS colors are available in coated (C) and uncoated (U).
- Coated (C): For shiny or non-porous surfaces like plastics, polybags, glossy boxes, and labels.
- Uncoated (U): For matte or absorbent surfaces like uncoated paper, cartons, and the mesh side of bagasse products.

Coated (C) vs. Uncoated (U) on Kraft

On kraft paper, Pantone (U) is the standard choice, while Pantone (C) can produce unexpected results due to the paper's high absorption.

- Pantone (C): Appears darker and less vibrant than the swatch guide.
- Pantone (U): Absorbs into fibers for a flat, matte finish; the brown paper "shows through," warming or darkening the ink.
- Tip: Add a layer of Spot White ink to improve accuracy (each layer counts as an additional color).

TAKEOUT

Takeout made easy with reliable packaging solutions

Durable, leak-resistant packaging solutions designed to protect meals, simplify service, and enhance every takeout experience.

PRODUCT MATERIALS

Fineline is committed to making thoughtful material choices with the planet in mind. Whenever possible, we use eco-conscious materials that are designed to reduce environmental impact while still delivering the durability and functionality our customers expect.

Below is a list of materials commonly used in our products.

MATERIAL		BENEFITS	PRODUCTS	RANGE
	PETE /PET Polyethylene Terephthalate	The world's most recycled plastic. It's established recyclability stream and clarity made it the ideal product for anything that needs to be displayed.	Plates, trays, bowls, hinged containers, portion cups, miniware	Min. -20°F Max. 130°F
	PP Polypropylene	Microwavable, strong, heat holding retains structure at high heat. Many products in this line contain post consumer recycled materials.	Hot & warm holding items Plates, flatware, containers,	Min. 0°F Max. 212°F
	PS Polystyrene Plastic	Rigid superior strength, exceptional clarity, lightweight.	Flatware, dinnerware, rigid items	Min. 40°F Max. 180°F
	PLA Polylactic Acid Plastic	This BPI certified material is a plant based plastic alternative. It's compostability is the right choice for environmentally concerned operators.	Containers, plates, and bowls	Min. 0°F Max. 105°F
	CPLA Crystallized Polyactic Acid Plastic	Heat-resistant and sturdy, this renewable material is made of starchy plants and then crystallized to withstand high heat	Containers, plates, and flatware	Min. 0°F Max. 185°F
	Bagasse	A 100% compostable natural molded fiber made of sugarcane pulp, bagasse is microwaveable, super strong, and is grease- and water-resistant	Plates, trays, bowls, hinged containers, portion cups, miniware	Max. 212°F
	Kraft Paper	Kraft paper is a durable, eco-friendly packaging make it a popular choice for packaging bakery goods, snacks, and takeout containers.	Bowls and napkins	
	PLA Coated Paper	Compostable and moisture-resistant, PLA offers eco-friendly sturdiness to disposable cups. A great alternative to PE-coated paper.	Bowls, containers and cups	
	PSM Plastarch Material	Biodegradable and heat-resistant, PSM is a thermoplastic that uses renewable plant starch and a blend of polypropylene fillers.	Flatware	Max. 200°F
